## ROOTERS ARE TO DRILL TO-NIGHT AT THE HALL

Poorly Attended Practice Held Yesterday

**7.30 IS THE HOUR FOR SONG REHEARSAL**

To-day and To-morrow to Prepare for Saturday

Yesterday afternoon's rooters' practice was just about as disappointing as Tuesday's meeting. Only about thirty fellows were out, in spite of the appeals for support that have been made. No doubt the last practice will be well attended, but it is not thought that one practice is sufficient to get the men trained on the new songs, so it is hoped that a large number will be out at tonight's song-drill. Saturday's game will decide the necessity for a play-off, and at least half the game should be won by the rooters' club making their cheering the best yet. The practice to-night is called for 7.30 in Strathcona Hall, and a crowd equal to those for the Varsity game are expected.

## UNDERGRADUATES AND PROFESSORS HAVE HONOUR ROLL

Beautiful Token of Esteem to Men of Medical Faculty who Have Enlisted for Active Service

Upon entering the office of the Registrar of the Medical Faculty one of the first objects to greet the eye is a unique roll of honor of those who have enlisted for active service.

The moment contains in panels the names of the professors and students of the faculty who have enlisted but there is space left for many more which is a certain grim suggestive significance attached to it.

The inscribed names are surrounded by a beautiful oak mat, the whole being enclosed by a splendid frame of Circassian walnut.

This very official reminder of the present conflict and McGill's active participation therein was designed by Miss Brand—the popular and efficient secretary to the Registrar.

**PROFESSORS.**  
Dr. F. G. Finley.  
Dr. K. Cameron.  
Dr. A. MacKenzie-Forbes.  
Dr. C. B. Keenan.  
Dr. S. H. McKee.

## MATCHES PLAYED IN THE INTERYEAR SERIES AT R.V.C.

Basketball Games Yesterday Were Fast and Keenly Contested

The first of the interyear basketball matches was played yesterday at 2.15 p.m. between seniors and juniors. At the end of the first half, the score was 17 to 3 in favor of the seniors. In the second half the juniors did not score at all and the seniors rolled their score up to a grand final of 28 to 3 at time.

There was some good playing, but a shocking large number of fouls. This is perhaps to be expected in the first game, and considering the few practices the match was a fairly creditable showing. The senior team had the advantage in height and weight, while it possesses quite a bit of speed as well. In the first half the junior defence was pretty weak, but stiffened a bit in the second.

Both teams require steady practice before the next match. The line-up was as follows:—

**SENIORS.**  
Baskets—M. Macoun, G. Boller.  
Guards—M. Bennetts, G. Story.  
Centre—L. Demuth.  
Wings—C. Smith, L. Macdonald.  
Spare—M. Dyke.

**JUNIORS.**  
Baskets—M. Cameron, H. Fraser.  
Guards—A. Douglas, L. Brerell.  
Centre—G. McDonald.  
Wings—M. Currie, R. Weinfelt.  
Spare—R. Shearlag.

The rule is common that we don't see how a fat man could make much headway at editing a country paper. It takes a thin man to squeeze through some of the tight places and if all the threats were carried out, he wouldn't get out with his hide whole at that—Mound Bridge (Kas.) Journal.

## LA SOCIETE FRANCAISE

Le Cercle Entertained at Tea Yesterday Afternoon

La Societe Francaise held a very pleasant and successful conversat, and tea, in the Common Room, at which Le Cercle was entertained from four to six yesterday afternoon. A conversation programme of seven numbers had been arranged. Much pleasure was given to those present by the delightfully rendered violin selections of Miss J. M. Boyd.

## RAILWAY CLUB ARRANGE TRIPS FOR THE YEAR

Many Interesting Tours Have Been Planned for this Season

## PROF. KEAY ELECTED HONORARY PRESIDENT

Members Who Have Paid Dues May Get Their Tickets

The Railway Club executive met at headquarters on Wednesday morning, November 11th, to transact business and make arrangements for future trips. Efforts are being made to visit several of the large manufacturing plants in the vicinity. The list of firms being approached includes the Canada Car & Foundry Company, Montreal Rolling Mills, Frontenac Brewing Company and others equally well known.

A schedule of interesting meetings is also being made out for the winter season, and speakers arranged for. The members of the club will thus be enabled to hear some of the most prominent men in the engineering world.

Prof. H. O. Keay, chief of the Railway's Department, was elected to the chair of honorary president.

Previous to the C. N. R. tunnel trip on Saturday last, several gentlemen took the opportunity to call at the club to see the club's new building. If they will call at "Harry's" office on Friday morning their tickets will be waiting for them.

## BASKETBALL CLUB HAS COMMENCED SEASON'S WORK

Large Number of Active Members Makes the Prospects for this Year Very Bright

The first practice of the basketball club was held Tuesday evening in the central Y.M.C.A. There was a large turnout and some very promising material among them.

The practice took the form of a game in which about twelve men were worked during the evening against the seniors. Conover, Baldwin, Smith, Kennedy and Perrault were on the senior line-up. They played consistently throughout the whole game although they were practically faced during the whole period, with fresh men. The condition of the first team was truly remarkable at such an early date.

At the conclusion of the practice George Kennedy was elected captain for this year.

All men who have ever played basketball are asked to attend the practices. The next one is at 5.15 this afternoon. The McGill Grounds Ticket entitles you to a Y.M.C.A. membership card.

The following appeared in Harper's Weekly. Its editor, Mr. Norman Hapgood, has a world wide reputation as a journalist, and his editorials are always of the best quality.

Missrepresenting Gladstone's position toward Belgium, referred to by us last week, Dr. Dernburg also misrepresented the policy of England toward the small European states. It is simple. She defends them if she can, not if she cannot. Serbia, for example, is beyond the reach of naval power and therefore not primarily her business. To a certain extent this holds of Luxembourg. It is one thing to have a policy; it is another thing to be able always to enforce it. When the Luxembourg treaty was being negotiated, the English Foreign Minister, Lord Stanley, said in case it was violated, "I would like to make the other signers 'a right to make war, but would not impose the obligation.'"

Of course, so simple a point is in reality fully understood by Dr. Dernburg. If Dr. Dernburg is not satisfied with the quotations from Gladstone given last week, here is another:

"We have an interest in the independence of Belgium which is wider than that which may be found in the literal operations of the guarantee. It is found in the answer to the question whether, in the circumstances of the case, this country, endowed as it is with influence and power, could quietly stand by and witness the perpetration of the direct crime that ever stained the pages of history."

Those who defend the moral doctrines of the Prussian leaders might as well leave Gladstone out of their argument.

Let us not forget, by the way, that Luxembourg also protested against the invasion. She felt too small to fight, but she was not the less outraged. And Prussia not only guaranteed her neutrality, but drew up the form of the guarantee herself.

## ATHLETIC ASS'N WILL DISCUSS CONSTITUTION

Meeting Will Be Held in Strathcona Hall To-night

**EXECUTIVE EXPECT LARGE ATTENDANCE**

Important Changes Have Been Proposed for Adoption

A general meeting of the Athletic Association is to be held to-day at 7 p.m. in Strathcona Hall. Important changes have been proposed for adoption by the Athletic Association Executive, and they will come up for consideration at this meeting. The proposals are an honest attempt to bring the rules of the A. A. into working order, and to make them fit to cope with the university athletics. The most important change is the new rule regarding "medical" examination for competitive athletes, which the Athletic Association is going to enforce strictly.

After being voted on and passed at a general meeting of the Athletic Association these proposed changes will have to be passed by the Athletics Committee of Corporation before coming into effect. Twenty-five men are required to form a quorum, and it is hoped that a lot of men will turn out at the meeting and really get straight on how the affairs of the Athletic Association are managed.

Men who have any misunderstanding as to how things are run, and who wish to ask many questions, will be most welcome at the meeting, when the executive will do what they can to answer them.

## HISTORICAL CLUB STARTS PROGRAMME FOR YEAR TO-NIGHT

Three Papers Will Be Ready at C.O.T.C. Armoury

The first meeting of the club will be held in the C.O.T.C. armoury rooms this (Thursday) evening at eight o'clock. The papers to be read will be three papers read on the general subject of Louis XIV. his period and influence in his times. Every member should make a definite effort to be at the meeting, and also to be there on time. The papers should have material which has a definite bearing on the general aims at ascendancy in Europe, and show some of the sentiment which is being shown in Germany at the present day of the tradition and examples to which they harp back in their efforts at ascendancy.

To the end that there may be a good discussion, members would do well to take a glance at the map of Europe, and refresh their memories.

## WOOD CUP FINALS BETWEEN SENIORS AND SOPHS. TO-DAY

Rousing Struggle is Expected Between '15 and '17 at Noon

The finals in the Wood Cup games will be held between 12 and 1 o'clock to-day, when a rousing struggle is expected. Marsters failed once more for the chief honors. All year '15 players are requested to be at the campus at 12 noon sharp, and rooters would do well to be out in force also, as a good game is in prospect.

## U. N. B. TEAM WINS CHAMPIONSHIP OF MARITIME LEAGUE

Acadia University Decisively Defeated for Honours Down-by-the-Sea

The football team of the University of New Brunswick won the championship of the Maritime Intercollegiate League and possession of the Clarke trophy for the first year by defeating Acadia at College field, Fredericton, Friday afternoon. The final score was 25 to 3, and is the most decisive defeat that any team from the Wolfville institution ever suffered.

U. N. B. clearly outplayed their opponents at every stage of the game, and it was a well-merited victory for the Red and Black. A heavy rain and snowstorm in the morning led the football field in a wretched condition.

First half.—Acadia, McMurtry scored on 50-yard run, securing the ball when Murphy muffed a pass in middle field. On attempted convert Atkins let the ball fall on the ground, and kick was a failure. U. N. B. forwards charging successfully. U. N. B. forwards blocked Eagle's kick, and when the ball went over the line Malman fell on it. Marsters failed to convert. U. N. B. Edgcomb from a ten-yard scrimmage, Marsters failed again. U. N. B. Edgcomb scored on another run from scrimmage. About fifteen yards out. Marsters' kick fell short. Half-game score: U. N. B., 9; Acadia, 3.

## "McGill Supply Store"

**25% OFF ALL MCGILL SWEATERS FOR A FEW DAYS ONLY**

**SCOTT BROS.,**  
404 St. Catherine Street West.  
Between McGill College Avenue and Mansfield.

The Bank incorporated under the Savings Bank Act doing business in the City of Montreal. Its charter (different from that of all other banks) ensures every possible protection to depositors. ITS OBJECT is to receive and to SAFELY INVEST savings, however moderate, of the widow, orphan, scholar, clerk, apprentice, of the young people and the working industrial and agricultural classes.

Every courtesy and attention will be shown to you, whether your account be large or small.

**M. W. POWER** - Manager.  
St. Catherine St. West Branch—Corner McGill College Avenue. Ask for one of our "Home Savings Banks." It helps you to save.

## ROYAL INSURANCE COMPANY

LARGEST AND WEALTHIEST FIRE INSURANCE COMPANY IN THE WORLD.

## LIFE DEPARTMENT

SOME "ROYAL" RECORDS.

**PROFITS**  
Same unvaried high rate of profits for 15 years.  
Over \$1,000,000 cash distributed to policyholders at last declaration of profits, being 26.8% of the with-profit premiums received during the quinquennium.

**FUNDS**  
Life funds over \$50,000,000, over 40% of sums assured.  
**ECONOMY**  
Expenses 13.95% of premium income.  
**CLAIMS**  
No claim has ever been contested.

The building of all the houses, the mills, the bridges and the ships and the accomplishment of all other great works which have rendered man civilized and happy, have been done by the savings, the thrifty, and those who have wasted their resources have always been their slaves.

The time to begin to save money is now. Write at once for particulars of special Student's Endowment to J. M. Conla, Royal Insurance Co., Limited, Montreal.

## Second Hand Transits & Levels FOR SALE

Complete list furnished upon request. Send for catalogue of Engineering and Drafting Supplies and Books.  
**HARRISON & CO.,**  
53 Metcalfe Street, MONTREAL

## Drawing Instruments in great variety, loose and in cases. Special Discount to Students.

## Notices

**HISTORICAL CLUB.**  
The first meeting of the club for this session will be held in C.O.T.C. armoury rooms to-night at 8 p.m.

**HOUSE COMMITTEE.**  
Important meeting of Union House Committee at 6.30 p.m. Thursday, the 12th. All members should be present.

**BIBLE STUDY.**  
Bible Study Leaders please take notice. At the Strathcona Hall, on Friday, November 13th, at 6.30 p.m., a dinner will be held, after which very important business is to be taken up. Don't fail to be present.

**ORCHESTRA.**  
A full rehearsal of the Undergraduate Orchestra in Strathcona Hall Saturday next at 7.30.

**FRESHMEN SMOKER.**  
The Arts Freshmen-Sophomore Smoker will take place in the Union Friday evening at 8 o'clock. As many Sophomores and Freshmen as can are invited to attend.

**BASKETBALL.**  
There will be a basketball practice in the Y.M.C.A. this evening at 5.15 p.m.

**WATER POLO.**  
There will be a Water Polo practice in the Y.M.C.A. tank to-night at 5.30 p.m.

fumbled the ball, coming out of scrimmage near the line, but recovered in time to pass to Edgcomb, who scored his third. Marsters failed once more.

U. N. B.—Murphy stopped an Acadia dribble and dodged through the centre for a try. Marsters came to time with his first convert. U. N. B. half-line run, Edgcomb to Burden to Murphy to Balkan to Coach "Hump" Campbell. Balkan and Coach "Hump" Campbell's dance was held at the U. N. B. gymnasium in the evening in honor of the Acadia football team, and Coach Campbell.

Has it made you a brother to the weak? Have you learned how to make friends and keep them? Do you know what it is to be a friend yourself? Can you look an honest man or a pure woman in the eye? Do you see anything to love in a little child? With a lonely dog follow you in the street? Can you be high-minded and happy in the meanest drudgeries of life? Do you think washing dishes and hoeing corn just as compatible with high thinking as piano playing or golf? Are you good for anything yourself? Can you be happy alone? Can you look out on the world and see anything except dollars and cents? Can you look into a mud puddle by the wayside and see a clear sky? Can you see anything in the puddle but mud? Can you look into the sky at night and see beyond the stars? Cut out this editorial and pin it up before your study lamp. Look at it often, read the above questions and ponder over them. There is a world of philosophy and of serious thinking connected with every question that this professor asked. Can you say "yes" to any or all of the questions? Take another look at the last five questions: How about the next to the last one? Do you see anything to love in a little child? Can you look an honest man or a pure woman in the eye? Are you good for anything yourself, especially for anything that is brotherly or sisterly? Now, are you advised?

A professor in the University of Chicago recently told his students he should consider them educated in the best sense of the word when they could say yes to every one of the questions that he should put to them. The following were the questions that he desired them to be able to answer in the affirmative:

Has education given you sympathy with all the good causes and made you espouse them?

Has it made you public-spirited?

## Futurities

To-day

1 o'clock—Interyear play-off.  
2 o'clock—Railway Club Executive picture, River's Studio.  
5 p.m.—Water Polo at Y.M.C.A.  
5.15 p.m.—Basketball at Y.M.C.A.  
6.30 p.m.—Union House Committee.  
7.00 o'clock—Meeting of Athletic Association in Union.  
7.15 o'clock—Practice of Wrestling team in Central Y.M.C.A.  
7.30 p.m.—Rooters' Club practice in Strathcona Hall.  
9.00 p.m.—Junior Dance Committee in R.V.C.

To-morrow

6.30 o'clock—Strathcona Hall, supper for Bible Study leaders.

## Those Exams.

The perennial discussion of the respective merits of final examinations as against a series of quizzes each contributing a certain percentage of the total marks and occurring at intervals during a course, is always a live one. The tendency of educationalists for some time past has been to substitute the second of these methods for the more time-honored one, but the advocates of the grand final test are many, and have much to say for their cause. There is no question but that working steadily with a view to a definite examination, necessarily preceded by a review of the subject as a whole, gives one a sense of perspective to be gained in no other way, and training in point of view and sense of proportion is what we come to college for. Moreover, the moral value of this method is great, the student is thrown on his own resources and forms his own habits of study, indispensable training for men who are to advance human knowledge in their special fields. The three examples of this system which come first to mind are certainly weighty ones—the Oxford finals, the Ph.D. finals at Harvard and elsewhere, and the Law finals at McGill.

In favor of periodical quizzes it is rightly urged that the arguments just used apply, as a rule, to mature students only; the majority of College men cannot accept the responsibility of study with no spur but the distant prospect of an examination. The result is a year's loaf followed by a most dangerous type of dissipation, the big cram, where the material is neither understood nor digested, and almost immediately forgotten. The final, too, gives an unfair advantage to a particular type of individual ability, at the expense of men who have a better grasp of the subject and in the long run are more capable. The examination is a nervous strain intensified by long and unpleasant anticipations; moreover, many courses have natural divisions in them, when examinations might quite well be held.

As is usual in such discussions, the way out seems to be by a compromise. With mature students it seems unreasonable to enforce the professors' whims and particular ideas of study on the men by means of frequent tests which become merely a nuisance. With younger students the quizz acts as a valuable spur, and helps to bridge the rather dangerous gap between High School with a master's ever-watchful eye, and college with its "go-as-you-please" methods. As a rule, it will probably be quite safe for the Faculty to consult the ideas of individual classes as to what their particular needs are.

## All Up, McGill!

If our old slogan is to mean anything, men, it must be answered unhesitatingly when opportunity affords, and now is your chance. The thought of Christmas exams can no longer be merely dismissed with a shudder, the time is too short for that, but the team needs your support, we must cinch that championship. The only thing most of us are able to do is to turn out and ROOT, why not do what we can? The attendance at Rooters' Club practices is much smaller than in the beginning of the season, although the need of hearty cheering is greater than ever. Men make this small sacrifice of time; the team are training, why aren't you?

## McGill Twenty-Four Months Ago

From The McGill Daily of November 12, 1912.

Ottawa was chosen as the place of the play-off for the championship this year at a big meeting held last night in the Windsor Hotel.

McGill had the choice of three subjects for the big debate, that is to be held soon. They chose, "That England should adopt conscription." "Small

colleges are better than large ones," Queen's chose the latter.

Nobody felt any worse for Saturday's game, and the whole senior team was out last night with a few intermediates in preparation for Saturday, when we have to play the most important game of the year.

## REFLECTIONS OF A COLLEGE MAN ON TRYING TO GET A JOB.

The value of the education of a college youth is measured not by brains or skill, but other things forsooth.

He wears a tie of awful blue or else a louder red.  
So people won't suspect the truth that all his brains are dead.  
He oils his hair and parts it in the middle of his "dome."  
And underneath that faultless part there's nobody at home.

And when he goes to see a girl, he sneezes out the light,  
And fusses till the dawn appears and overcomes the night.  
A college man is good at this—a graduate in such—  
He fluses in Italian, in Spanish, or in Dutch.

He always has his trousers pressed when he goes for a walk;  
He oils his hair and parts it in the air and frowns upon the gawk.  
A frank and open face has he,—it's open like a gate;  
His face is smooth, his skin is soft, for everything he's late.

His lunas are coated thick with Durham nicotine;  
He owns a pipe with letters on, which always may be seen.  
Is that a hat upon his head, or are we color blind?  
We always thought that red and white on sign-boards we should find.

I'll tell you now concisely what a college man may be—  
He's a flaring advertisement of sheer futility.  
He's nothing but a great big sign that says to business' ken—  
"I've a college education"—and they pass him by for men.

Michigan appears to have been beaten by Harvard by mistakes made in playing the kicking and passing game. The Crimson used punting to good advantage and called on the forward pass on three occasions to cover required ground. In contrast, the Wolverines repeatedly tossed passes and returned punts, regardless of the fact that nothing definite was to be gained by such a style of play. Maubetsch and Hughtitt are the particular Michigan backfield stars, the former as an end runner and line-plunger, and the latter as a punter and field goal artist.

## THE GREATEST SWEATER SALE OF THE SEASON.

The greatest values ever offered in sweaters in this city are now offered by the Busy Bee Sweater Shop, 532 St. Catherine St. West. All new stock fresh from the factories. Sweater Coats, \$24.99, regular price, \$37.50. Sweater Coats, \$27.50, regular price, \$42.00. We would ask the students to inspect our stock of sweaters before making their purchases. Remember the address, 532 St. Catherine Street, West.

## OXFORD RHODES SCHOLARS HAVE ALL ENLISTED

The forty American Rhodes Scholars who go to England for the first time this year find a strange Oxford. It is not the tourist's grey memory of the middle ages. It is not the playground of three thousand growing boys. It is a starved and sobered Oxford. Old buildings with their green and grey quadrangles, and their narrow stairs and isolated rooms, are strangely quiet. The river and the playing fields have given way to the drill ground. Many of the younger college dons are off with the army. The thousand members of the Officers' Training Corps are in active service. Of the remaining two thousand undergraduates a great part have enlisted, and of the others the majority have been kept at home either by anxious parents or because of necessary economies. The hundred Rhodes Scholars from the English colonies have enlisted.

The marble hall where President Hadley of Yale last June lectured to members of Oxford University on "property rights" is now divided, by stone walls laid on the floor, into operating, anaesthetic, and recovery rooms. On the fourth of August, before the declaration of war by England, and within five minutes after the close of the last examination of the summer, the beautiful examination schools building of Oxford University was in the hands of the English army's hospital department.

Under any other conditions than those of to-day, the substitution of the school's door of a sentry with bayonet for the time-honored porter's "bull-dog" would in itself strike horror. Where but three months ago the right of admission into the school was the privilege of the university, belonged only to those who were "attired in full academic costume"—white tie, cap and gown, and dark clothes—today red coats and khaki are the accredited dress. Where ancient students crowded around the results-board in the hall-way, now there are tearful women and children studying the hospital bulletins.

More fortunate than the continent, England does not need to close her great schools of learning altogether, but whatever the effect of the change on the future, for good or evil, the Oxford of 1914 is immeasurably removed from any other Oxford that ever was.—Harper's Weekly.

So long as laziness remains as one of the primary tendencies of the human mind, there will always be tutoring; and the under-graduate who blows smoke rings in October will watch his back in January. The tutor will never vanish from the face of the earth—for the late P. T. Barnum's figures are considered, in most circles, as more or less accurate. It is possible, however, to diminish the sum total of the tutored; in Princeton, that rests with the members of the Freshman class, who, starting four years in this university, can make and unmake many things. Every man who entered with 1913 has the mental power to pass his examinations without leaning on another's brain to accomplish that result. The question is merely one of energy.

Tutoring is a device for the mentally inefficient rather than for mental deficiency. It is true in certain isolated cases, Providence has withheld the usual brain processes from men. As a rule, however, the man who tutors does so because he is unwilling to work; it is on his part a deliberate confession of weakness—a weakness that, in the more advanced states, characterizes those mental inverters who take all their ideas, from politics to matrimony, second-hand.

Nine men out of ten in the present Freshman class have no need of tutoring in any subject, provided they are willing to do a reasonable amount of work. And they can do much to raise the scholastic tone of this university by using what brains they have in the way brains were intended to be used, instead of prostituting their reason and paying another man a dollar and a half an hour for the privilege.

(The "Daily" has decided to run a series of pen pictures of the more prominent men in various student activities. These are being contributed by a fellow-student whose several years attendance at McGill has enabled him an opportunity of making the personal acquaintance of most of the subjects of his articles. While these will be published anonymously the "Daily" guarantees that no advantage will be taken of that fact to print anything that might injure the feelings of any student or reader his relations with the paper less cordial.)

I have often heard it said by ardent advocates of student athletics that a university comes into more prominence and attracts more undergraduates to its doors by having a championship football team than by the achievements of its most learned scholars in the fields of science and letters. Be that as it may I have not the slightest doubt that quite as many people on this continent have taken an interest in McGill through the exploits of to-day's "Tin Gods" as have done so through the researches and publications of our most famous teachers. If, indeed, a championship football team is good advertising for a university then we must refer to George F. Laing as our champion press agent. Nevertheless our hero would be the last man in the world that one would choose to act in such a capacity, for he can never be persuaded to say a word about his own achievements, but stands as a shining expounder of the ancient dictum that, "Deeds speak louder than words." Our star half back is truly a modest man. I know of a fellow-student of his who worked alongside George in the dissecting room for a year and never knew that he played football. And yet this is the player on whose account the keener members of the "Rooters' Club" would abandon our classical motto in favour of the more modern, picturesque, and appropriate phrase, "Let George do it."

George Laing was born at Windsor, Ont., in 1893 and educated at Trinity College School, Port Hope. He came to McGill five years ago and entered the Faculty of Medicine. In his sophomore year he first jumped into prominence as a member of the senior rugby team when McGill's outside wings, Laing and Lewis, became known as the greatest pair in Canadian football. George earned the reputation of being the fastest outside wing in the game, and no matter how far that famous punter Eric Billington booted the ball down the field Laing was never far behind it. His record of intercepted passes will probably never be equalled and once he gets away with the ball there is little chance of his being overtaken.

Laing played outside wing for two seasons and was then tried out on the back division. He has now developed into a long distance punter and can place his kicks with skill. In addition he has a safe pair of hands and with all these accomplishments naturally stands at the top of the list among half backs. In fact, he has an international reputation and his famous run in the Queen's game at Kingston this year was chronicled at length in American newspapers.

George is deservedly popular and in addition to class and faculty offices has held the captaincy and the presidency of the football club and the presidency of the Intercollegiate Rugby Union. Records compiled for last year's "Annual" showed him to be the youngest man in his class; but youth has proved no handicap and in his studies he ranks among those whose efforts tend to show that athletics and scholarship are not incompatible.

I had almost forgotten to mention that our hero is also a tennis player. Besides figuring on two intercollegiate rugby championship aggregations and a possible third, he led a McGill tennis team to victory over Toronto, Queen's, and R.M.C. a year ago. He has also won the Provincial Championship and the Montreal Cup against the best players of Quebec, thus establishing a record for versatility in combining a mastery of two such different forms of sport as football and tennis.

George graduates this year and we hate to see him go. No one will be more missed; for, with his departure, we feel we are losing one who has done much for McGill football, not merely by his ability as a player, which has gained the admiration of his bitterest opponents on the field, but also by the clean-cut, sportsmanlike manner in which he plays, which has earned their respect.

## Revision of Athletic Constitution To Be Proposed For Adoption

Students are requested to become familiar with the proposed changes before the Special Athletic Meeting To-night.

### THE MCGILL ATHLETIC ASSOCIATION.

Montreal, October 7th, 1914.

NOTICE IN ACCORDANCE WITH ARTICLE XXIX OF THE CONSTITUTION OF THE MCGILL UNIVERSITY ATHLETIC ASSOCIATION.

Proposed amendments to the Regulations, Constitutions, By-laws and Agreements governing Athletics in McGill University, pages 3-14. To be taken up at the Special Meeting of the Athletic Association, November 12, 1914, at 7 p.m.

### GENERAL RELATIONS OF THE ATHLETIC COMMITTEES.

Article I.  
The Athletics Committee of Corporation.

1. This Committee has vested in it the ultimate authority and power of supervision in all matters affecting Athletics in the University and control of the grounds.  
2. Inasmuch as also under the Constitution of the Students' Society the fees collectable from Students are to be turned over to the Council of Expenditure in the interests of the Students, it will be the duty of the Athletics Committee of Corporation to have presented to it, at such times as it may require, statements of all receipts and expenditures in connection with Athletics.  
3. The Students' Council will, in accordance with the foregoing, present a statement of receipts and expenditures of all Athletics money since the previous meeting and up to the date of the meeting.  
4. This Committee shall have submitted to it a report of all meetings of the Athletic Association, and shall have power to sanction, reject or amend all resolutions of that Committee regarding the issuance of tickets, the passing of medical examinations, the report from captains of clubs in regard to conduct of teams, the approval of constitutions of clubs, alliances with outside bodies and applications from clubs for permission to play against such outside bodies. The committee shall also have the final decision regarding the hours at which any club shall use the grounds, and the disqualification or re-instatement of any student.

### Article II.

1. All fees collected from the Students for athletic purposes shall be

handed over to the Students' Council, with the exception of such portion, as may be set aside for the upkeep of the grounds.

2. The Students' Council shall present an up-to-date statement of all receipts and expenditures of Athletic monies to the Athletics Committee of Corporation at the monthly meetings of that body.

3. The Students' Council shall make or authorize all necessary contracts or purchases upon presentation of a proper requisition from the club concerned, shall have power to employ such servants and assistants, as it may think fit, and shall apportion to each club, such annual grant as it may deem necessary for that club to receive.

4. The Students' Council shall not be liable for damage done to the grounds by outside clubs, having permission to use the said grounds.

### Article III.

The Athletic Association.

1. The Executive of the Athletic Association shall have the control and management of all Athletic affairs, subject to the approval of the Athletics Committee of Corporation or the Students' Council, as the case may be.

2. It shall pass all applications for McGill badges subject to the rules governing the wearing of them.  
3. It shall recommend what hours shall be granted to each club to use the grounds, shall decide all cases of disqualification or re-instatement of any student and shall approve all constitutions and amendments thereto of the affiliated clubs.  
4. It shall see that all constitutions are being enforced, and that Athletic affairs are being conducted satisfactorily.

5. It shall recommend to the Athletics Committee of Corporation the course it considers best with regard to applications from clubs to play against outside teams.

6. It shall grant permission to students to play with outside teams, if it thinks fit.

7. It shall appoint representatives to the meetings of the C. I. A. U.

8. The Minute Book of the Athletic Association shall be placed in the hands of the Secretary of the Students' Council after each meeting of the Athletic Association. The Secretary of the Students' Council shall make two copies of the minutes of the last meeting, one to be retained by the Students' Council, the other to be given to the President of the Athletic Association for presentation to the Athletics Committee of Corporation.

ation to the Athletics Committee of Corporation.

### The Athletics Committee of Corporation.

1. The management of the College grounds and of the out-door Athletics and sports is under the control of the Athletics Committee of Corporation.

2. The Committee is responsible for the general maintenance of all University grounds and retains the ultimate authority and power of supervision in all matters affecting Athletics in the University.

3. The following extracts are made from the rules and regulations of the Committee, for the guidance of the members of the University and the several Athletic clubs and associations which are from time to time permitted to use the grounds.  
a. During the summer season the Sherbrooke street gates shall be closed between 10 p.m. and 6 a.m. every day, and the University and McTavish street gates between 6 p.m. and 7 a.m. on week days and the whole day on Sunday.

b. Such persons as are entitled to use the grounds shall be provided with tickets renewable each year. Those entitled to tickets are the members of the University and prominent benefactors, and the families of Governors and Professors.

c. The several clubs may be permitted to issue special tickets, entitling the holders to admission to the grounds for the purpose of viewing matches, or for other special occasions of public interest. All students desirous of taking part in Football matches, or otherwise engaging in violent athletic contests, must pass a medical examination, to be held under the direction of the Medical Director of Physical Education. A complete record of all such examinations shall be kept by the Director or some other officer appointed to this duty. The Managers and Captains of clubs, or other responsible executive officers, are required to insist upon the strict observance of the rule in regard to medical examination, and all the rules and regulations of the Committee which concern them.

d. All clubs must submit their regulations, rules, and by-laws, and any changes in the same, for the approval of the Committee. They must make application for the use of such portions of the grounds as they require, and for any special privileges.

e. Clubs must engage in matches with outside clubs except with the approval of the Committee.

## Whatdyea Mean, Cold?

Betcha won't be cold long if you get into a suit of the Underwear we're selling these days. Listen to this: We carry all the celebrated lines of Penman's Underwear: of Wooley's Underwear; of Stanfield's Underwear, and we have a complete size range in all three makers' goods, and please note this: we sell most of these lines every day of the Fall and Winter at prices lower than we have ever seen in any advertisement of any store. Penman's No. 95, for instance:  
Shirts in sizes 34 and 36.  
Drawers in sizes 32 and 34 are \$1.00 a garment.  
Shirts in sizes 38 and 40; Drawers in sizes 36 and 38, are \$1.15 a garment.  
Shirts in sizes 42 and 44 and Drawers in sizes 40 and 42 are \$1.25 a garment.  
Shirts in sizes 46, 48 and 50, Drawers in sizes 44, 46 and 48, are \$1.50 a garment.  
Combination Suits in sizes 34 to 40, are \$2.25 each.  
Combination Suits, in sizes 42 to 44 are \$2.50 a garment.

### INTERMEDIATES HAVE WORKOUT IN DEEP SNOW

Conditions Were Far From Favorable at Yesterday's Practice of Second Team

**PRACTICE WAS A SNAPPY ONE**

Team Showed Class Yesterday—Final Signal Drill This Afternoon

A white blanket of snow covered the campus yesterday afternoon when the gridiron athletes made their appearance for the daily signal drill. The drill was held in the snow, and the players showed good gains through the snow. The first team held the second team back through a snappy signal drill, followed by a strenuous line-up against the seniors.

There was a good turnout of players. Consequently, the coach had a string of some ten candidates following the various evolutions of the first line of players throughout the afternoon. Whenever "Sine" has a superabundance of material he does not seem to mind the extra players. He is a punting contest behind the goal posts, but makes them follow the plays of his regulars from behind the line, in order that every member of the squad will know the different positions in case he should be sent into a game.

A few new plays were tried for the first time yesterday, and will probably be used in the game with St. Michaels tomorrow. Two or three of them look as if they would be big ground gainers if worked properly. By the end of the workout the members of the team had become fairly familiar with the new methods of attack, but in order to put on the finishing polish another practice will be held this afternoon. This is expected to put the players right on edge for their final appearance this season, and from the way the team performs to-day, some indication of their chances at Toronto may be gleaned.

The squad will leave for the Queen City to-night. About twenty players will probably be taken along, but exactly who these will be is not yet definitely settled. It is unlikely, however, that any changes will be made in last Saturday's lineup, as the team worked well on that occasion. A number of substitutes will be on the side lines, so that in case of injuries to any of the regulars or an ascension in any portion of the team, someone can be shoved into the gap. Since himself will be able to accompany the team for the game. This will be the first encounter in which he will have seen his men work this year, owing to the fact that whenever the seconds have played heretofore, the coach has always been under the necessity of looking after the Montreal outfit.

### INTERCOLLEGIATE CROSS COUNTRY RUN SATURDAY

McGill Representatives Are Confident of Winning Title at Kingston

The fourth annual intercollegiate cross-country run will be held at Queen's University, Kingston, on the coming Saturday at 10 a.m. The prize is a handsome silver cup, the Little Cup—presented by Mr. Hal Little in 1911, at the first run. The Cup has been won by Toronto three times and once by McGill.

McGill will be represented by an exceptionally strong team this year, composed of White, of Macdonald, the champion half-mile; Gerrie, the man who made Clarke, of Toronto, break the three-mile record; and of McCreary, McDermott and Antliff, men who have won the team, but all of them have had previous experience in cross-country work.

All the team has been shining up very well in the practice runs, sticking close together, and in spite of adverse weather conditions making very fast time, and thanks to Coach Bailey, are all in excellent trim. All five men finished within a minute and a half in the elimination run after a course of over four and one mile, miles, which was covered in 25 minutes and 20 seconds.

McGill confidently expects that the men who wear her colors will be "at the front" at the finish at Kingston on Saturday.

### MEDICINE '17 DEFEATED SOPHS. YESTERDAY NOON

### Easily Outplayed Medicine '18 Who Put Up a Game Fight

At noon yesterday Medicine '17 again won for the third season the class championship of rugby in the Faculty of Medicine by defeating Medicine '18. The final score being 23 to nil.

The fact that there was an inch of snow on the ground and that the weather was quite cold did not worry the study combatants in the least. The game started at 12.30, soon after the appearance of one of Medicine '18 players, who was wearing a straw hat. From the first Medicine '17, who had the heavier team, played on the aggressive. The opposing team seemed to just melt away when '17 got into action. The heroes of the day were Busby, who made a brilliant run for a touch-down and did some excellent kicking; Tingling, Stewart and Fails, Touhy and Smeltzer starred for '18 but their heroic efforts were of no avail.

By winning this game Medicine '17 is entitled to play against the champions of Arts and Science for the inter-class championship.

### THE SHIFTS IN SENIOR LINE-UP MADE BY COACH SHAUGHNESSY TO STRENGTHEN THE WING LINE

First Team Showed up Well in Workout Against Intermediates—Quilty is Travelling at Fine Clip

**TACKLING DUMMY BEING MUCH USED AT PRACTICES**

If Play-off is Necessary Lansdowne Park Cannot be Secured, but Varsity Oval Will be Considered

The senior team had their first hard workout since their defeat in Toronto yesterday afternoon. Although the ground was covered with a sheet of white, which nature had drawn over the gridiron, the first and second squad lined up against each other for about twenty minutes. The ground was hard underneath the snow, but no one was hurt in the tackles. The first team held the seconds perfectly, and also made good gains through Sine's fourteen. The new plays which have been made up since the game in the Queen City worked well and look promising.

Shaughnessy made several changes in the line-up, and the team, after he was through with it, presented a very different front than it did at this time last week. Quilty was back at his old place of flying wing, and showed up very well. The big fellow is going better than ever before in his football career, and is now one of the best men in the intercollegiate. Seath was put in at right outside in Kennedy's place, and made a fine showing. He is also going well right now, and should be an improvement on Kennedy, who has not been able to hit his stride right this season. Seath is also heavier than the man whose place he is taking, and his being at outside will help in this respect. In Quilty's place at left middle, Demuth was worked out. This is an entirely new place for Otto, but he is making a fine showing. He is also making a fine showing out of the former scrumrunner. Reid was also moved out of the scrimmage, he is going to inside wing in Brown's place, and the latter going into the scrimmage. Greenwood, the occupant of the position, was taken out of the scrimmage when Demuth was taken out of the Blue and White.

There will be a signal practice and some running for both squads to-day. Shaughnessy would have liked to have had another line-up, but as the second team have to leave for Toronto this evening, he has decided to let the team run the chance of anybody being hurt.

### GRIDIRON GRIST

(BY "FIELD GOAL")

Weight on the line is what McGill is badly in need of these days. No team can very well expect to land a championship with a team on which the average weight of the wings does not reach 160 pounds. It is true that since Shaughnessy has had charge of the McGill team it has never been very heavy, but it has made up in speed what it has lacked in pounds.

The first year that we won the championship the line was heavy, but was also fast, and nothing could stop it when once it started forward. Beggall, Mathewson, Waterous and such like heavyweights were physical giants, but at the same time could get over the ground faster than the average player. Last season, though the line was weaker than in the previous year, it easily made up in speed and tackling ability what it was wanting in weight. Also, the other teams in the league were not as heavy as usual, which offset McGill's lighter line.

Varsity have this year a wonderful line, which is a small sized benefit in itself. On Saturday, it was evident that the Blue and White players were greatly superior in weight to their opponents, but this is not their only attribute. The Toronto wing men are very fast, and are wonderfully strong, being at their best when making interference. The holes they opened among the Red and White wings were something to be marvelled at. Gage and his side partners have this heavy line work down to a perfect science. The Blue and White authorities must have fine-tooth combed the University in order to single out the fat men and strong men who would make footballers.

Another Toronto team has been able to keep itself at the top of its league, and probably will have to play off for the premier honors with the Tigers, and this is the Argonaut aggregation, chiefly by the heavy line which it has. Argos have just about bucked their way to a championship, and after Saturday's match with McGill it looks as if, should Varsity win the championship in the intercollegiate, the same thing might be said about the Blue and White.

This year, unfortunately, there has been a terrible dearth of wing men around McGill, and Shaughnessy had to rely on a line of which neither weight nor speed is a remarkable feature. When it is taken into consideration that Quilty is the heaviest man on the team, and that he only tips the scales at one hundred and seventy-one pounds, one can get a slight idea of the featherweight sort of wing line McGill has now got. It was all right at the start of the season, when Waterous, Lemay, Hughes and Rodden were playing, but now it is a very different thing. If the team is to make a great difference, Beggall is another man whose presence on the team would assist wonderfully. Both these men possess weight, and are fast, besides, the second named is one of the hardest tacklers the intercollegiate ever produced. The speed of the McGill line is nothing to boast of, and the team could very well stand a little more of this. Time and again on Saturday if the men on the wing line had been fast they would have been able to get down on the half-backs before he got started. If the line, a great deal more, if possible, is what Shaughnessy wants. An addition of some weight would also help; but lacking either of these qualities in big orders, a little more of combined speed and weight would be very welcome.

### REVISION OF ATHLETIC CONSTITUTION TO BE PROPOSED FOR ADOPTION

Continued from page 2.

h. It is the business of the President of the Athletic Association to see that the rules are enforced.

**CONSTITUTION OF THE MCGILL UNIVERSITY ATHLETIC ASSOCIATION.**

**Article I.**  
**NAME AND OBJECT.**  
The name of this association shall be the "McGill University Athletic Association," and its object shall be the encouragement and supervision of Athletic sports and games and the promotion of Physical Fitness among the Students of the University.

**Article II.**  
**Colors, Badges, Sweaters, Suits, Uniforms.**  
1. Badge. The Badge of the Association shall consist of the McGill University shield in silver, crossed diagonally down from left to right by the letters "M.C.G.", and one inch from the top, and around the cuff, two similar bands around the neck; one band two inches wide and two inches from the end around the bottom.

2. Sweaters. The regulation McGill sweater ("pull-over") as adopted by the Athletics Committee, has a red body; two white bands one inch wide, one inch apart, and one inch from the end around the cuff; two similar bands around the neck; one band two inches wide and two inches from the end around the bottom.

3. Suits. The regulation McGill sweater is retained by the Athletics Committee of the University, and the direct control of the University.

4. Suit for Track and Field Games. Jersey—White, with suitable badge, three-quarter inch red bands around neck and arm holes. Trousers—White, with one-inch red band down outside of legs and an inch and a half red band around waist.

5. Uniforms. No other uniform than the one prescribed by the various clubs shall be worn by men representing that club in any athletic contest.

The promiscuous use of non-regulation uniforms and the wearing of "foreign" badges on the campus, or at any University Athletic contest, is prohibited, and if this offense be persisted in after due warning, such offender may be debarred from participation in

University athletics until reinstated by the Athletic Association.

**Article III.**  
**Membership.**  
1. The members shall consist of Undergraduates and Post Graduates of this University, and shall also consist of members of its affiliated Theological Colleges, and of all bona fide partial students taking two or more courses of lectures in any faculty of the University, provided they shall have paid their university or donated athletic fee.

2. Graduates have the privilege of becoming honorary members of the Association on the payment of an annual fee of ten (\$10.00) dollars. Payment of ten (\$10.00) dollars constitutes life membership for graduates.

3. Only ordinary members shall be entitled to vote or shall be eligible for office.

4. The Association shall include the Track Club, Rugby Football, Association Football, Cricket, Tennis, Skating and Hockey, Boxing, Wrestling, Fencing and Fencing, Harrier, Swimming, English Rugby Football, Clubs of the McGill University, and such other Clubs having been officially recognized by the Athletics Committee of Corporation, as may be admitted from time to time.

5. Should other Clubs desire admission to the Association, the terms of admission must be approved of by the Executive.

6. The Constitution and by-laws of each club shall conform to and be modelled on those of the Association, and shall be approved of by it. Each club shall, subject to the approval of the Athletics Committee of Corporation, have the management and control of all affairs relating exclusively to it. In no case, however, shall any regulation affecting the privileges of any student having been officially recognized by the Athletics Committee of Corporation, be made without the approval of the Executive.

7. The Captain or Management of each club shall enforce such training rules as they see fit. Neglect of observance of these club rules may lead to dismissal from the team in question.

8. No student shall be allowed to represent any athletic organization outside the University during the college season, including the Christmas holidays, unless they first obtain the approval of the Athletic Association, and

### ARTS SENIORS OVERWHELMED CLASS OF '17

The Work of the Winners' Half Line Was Very Speedy

The Arts Seniors yesterday won the rugby championship of their faculty by defeating the much-talked-of Sophomore fourteen, to the tune of 24-0. The fourth year men proved that they could play just as snappy football in several inches of snow as in the same depth of mud, for last week they triumphed over the Juniors by the score of 22-1. Yesterday was no day on which to stage a football match, but the men on the two teams were undaunted by the heavy snowstorm which took place during the morning, and each side had about sixteen men in uniform. The two teams were fairly evenly matched on the line, but Fifteen had it all over the Sophs on the back division.

Right from the commencement of play the Seniors' half-line started tearing off sensational end runs, which netted large gains for the winners. The heavy snow made it somewhat difficult to run fast, but even without handicap the half-backs on the Fifteen team showed remarkable speed. Seventeen resorted to line plays most of the time, but only once or twice were they able to buck for yards. The tackling of the Seniors' half-line was high class, and the opposing halves had not much chance to get away for any of their end runs, which they pulled off in their other games. Heron, who was expected to show great speed, was watched so carefully that he never saw an opportunity to get started. The condition of the winners was also of the best, as they were going just as hard at the end of the match as when they started to play.

The winners scored their points as the result of four touchdowns, one of which was converted, and three rouges. The half-time score was 16-0.

John Abbott scored no less than three touchdowns, and was also the bright star of the contest. His tackling was just as good as when he was playing on the first team last fall. In the position of flying wing he was a great source of help to his team, and was always in the thick of the play. Upham, Gibb and Clark, the half line of the Fifteen team, made some splendid passing runs, carrying the ball well and always passing in a sure manner. Upham is very fast, and several times went around the end for big gains as the result of his speed. Rexford, at quarter, showed up well, and generated the work on the losers and bucked hard, but his team were not able to open very big holes in Fifteen's line, which held well and went low for the bucks. Keir showed form at inside wing for '17. A large crowd of supporters from the two classes was present, and the end for big gains as the result of his speed. Rexford, at quarter, showed up well, and generated the work on the losers and bucked hard, but his team were not able to open very big holes in Fifteen's line, which held well and went low for the bucks. # THE MILITARY HAPPENINGS AT THE OLD MCGILL

## WIRELESS SECTION IS TO BE FORMED

Meeting in Physics Building This Afternoon at 4.15 for All Interested

The following notice which has been received from Professor A. S. Eve, of the Physics Department, should prove of great interest to all those who are interested in wireless work, and especially those who desire to go to the front in the spring. As will be seen by the notice, no time should be lost in forming a wireless section, and all who intend to take it up are requested to be prompt in their attendance at the meeting this afternoon.

**WIRELESS TELEGRAPHY.**  
The Department of Militia and Defence has lent to McGill University two new Marconi Pack Sets of Wireless Apparatus, as used by the British Army.

As it is imperative that the Department keep all its equipment available at short notice, the loan may not be more than temporary.

A meeting will be held in the Physics Building at 4.15 on Thursday, the 12th of November (to-day), and all those who may be interested are requested to attend. It is important that a section should be formed quickly to work with the apparatus so that no time may be lost.

It must be understood that there is no guarantee that employment will be found by the Government, but it is not unlikely that a demand may arise for those who are capable of handling the Wireless Set efficiently.

The scheme has the approval of the officer commanding the McGill University battalion.

A. S. EVE.

## The German Point of View

The following is a translation of part of an article by Vice-Admiral Kirchhoff, of the German navy, which appeared in the Hamburger Fremdenblatt for September 10th. It shows the attitude of the Germans to the war.

Let us begin with the past and foremost, that we have not merely to defeat our enemies in the East and West, but we must defeat and crush absolutely the perilsous Albion, the most pernicious of all political enemies, whose policy for centuries has been full of cunning and perfidy, to subvert her to such an extent that her influence all over the world will be broken forever. To crush England is our main task; to reduce her influence would be a blessing to the culture of the whole world. England must not be allowed to keep the influential position which she has held up to the present. The task is not an easy one, but it is a task worth all the sacrifices it will demand.

England must be crushed! But is this impossible? Never have lies, falsehood and cunning, during the years of peace, been successful; never has the world seen so clearly what the so-called fair play of Old England really amounts to as at the present moment. It is as though at last the mask has been torn from the face of the hypocrite. Nobody need be in doubt as to what the state of the world would be if barbarous Russia, France, and the bestial Serbia and Belgium, were to be victorious! But the heavy German and Austrian blows have destroyed this phantom.

German military and maritime forces are now ready in the North Sea and on the coast of the channel to throw themselves on England and to destroy it by all means at their disposal: by water, in the air, and on land, as well as by the forces of God and economics. And Germany, whether after a short or a long struggle, is going to accomplish this, and we shall not rest until we have gained our object.

## GERMANY'S DEFENCE OF MILITARISM

Not Germany, but German militarism, is declared by British leaders to be the object of their attack. Sir Edward Grey has said this explicitly. Prussian militarism, he avers, has plunged Germany and all Europe into this conflict, and when it is destroyed a brighter and truer day will dawn for the world and compensate it for the present awful sacrifices. Mr. Bonar Law, too, leader of the Unionist party in Parliament, says that the German people have permitted themselves to be made into a military machine that knows no right but might, and "that is what we are fighting." Such talk brings a reply from the Kölnische Zeitung, which is well worth reading to show Germany's view of its own militarism. Says this semi-official organ:

"It is, of course, easy to see why Prussian militarism should be nerve-racking for Englishmen, and especially for Sir Edward and his associates—that militarism which, burst like a storm upon the allied armies, and reduced the English expeditionary army to hardly half its original strength, and of which the London Times said: 'The rapidity of the German advance was, for those who are familiar with the territory and distances involved, only short of the miraculous.'"

"But what can the English shopkeepers, who buy their soldiers as they do their cotton-bales, what can these idlers for whom a common soldier is the most despised being on earth, even remotely know of the self-sacrificing spirit of a people which finds itself wedged in between powerful and jealous neighbors, compelled for the sheer purpose of self-preservation to become a veritable nation of soldiers? Call it militarism or what you will, it is the development of a century of strain and stress, and our system of universal military duty is nothing more than a system of national defence which the Germans is a national, an ethical ideal, yea, the most democratic of all institutions on earth, by which every one, noble and peasant, rich and poor, feels obliged to offer up his Fatherland and his all, his heart's blood. We have nothing but contempt for the English phrase-makers and English business-politicians who with contaminated fingers try to soil our national ideal. Let them but read our list of casualties, heroes and laborers, counts and peasants, Catholics, Protestants, Jews, Social Democrats, Conservatives, Centrists and Liberals, all without exception heroes on the field of honor, martyrs for the Fatherland! Your stables, O Englishmen, are not equal to ours. Only by enrolling in your army the flower of your people, instead of the scum of your Empire, will you be heard to discuss these things. When the command 'mobilize' was given, when the military system began to move and operate with the accuracy of a machine, when the German nation as a matter of course transformed itself into an army in gray uniforms, when our youth, laughing and carolling, marched out against our enemies, we overheard an old woman exclaim: 'See what we have for our axes after all!' That is the spirit of

## COMPETENCY IS OBJECT AND AIM OF THE C.O.T.C.

Instructors Expect to Turn Out Highly Efficient Officers in March 1914

With the organization of a large number of the members of the McGill Battalion, into a larger C.O.T.C. than heretofore, McGill has taken an important step. The importance of this move on the part of the military organizers at McGill may be clearly seen from the following facts. First, trained officers are needed now and will be needed more urgently before a year has passed. The casualty lists among officers in the British army, at present, are out of all proportion to the casualty lists among the privates. So far, there are very few Canadians actually at the front, but when they do reach the scene of the fighting there will, no doubt, be many vacancies to be filled by a reserve of officers. At present, such a reserve, as is desired, is scarcely a material fact; so Canada must devise some method of training men to be ready for these positions. This is where the C.O.T.C. at McGill will be of the greatest assistance to the Canadian government, because it is the aim of this organization to turn out competent officers.

Second: With all the members of the C.O.T.C. in touch with the officers in command, the standard of training can be kept much higher than where the men are scattered around various parts of the country attached to different regiments, some abroad, some at home. The course of training, here at the college, will be carried on in the same manner as any other college course; and here there are lecture rooms, draughting rooms, and, in fact, every condition necessary to a highly successful course. Besides the actual qualifying work the candidates for commissions have the advantage of belonging to the McGill Battalion, in which they can get training in all the branches of military work as employed in actual warfare.

The third important fact, about the large Training Corps now inaugurated at McGill is the length of time covered by the course. Whereas the usual time taken by a man to qualify for a commission is six weeks spent at a centre such as Halifax or Quebec; here, in McGill, the course will last probably till March. With such a period of time, the training will be thorough, and the men will be ready to go to the front in the spring.

These facts give some idea of the seriousness with which McGill is settling down to train her men to be officers competent to take their place in the militia and hold their positions with credit to themselves and to their country.

Since August the fourteenth, the members of the McGill C.O.T.C. have had more actual field work than any other militia regiment in Canada during the last four years. That fact alone should carry much weight, but when it is realized that this field work will be carried on just as energetically throughout the winter there seems to be little doubt but that McGill men will never be at a loss to know what to do in the event of the firing line. To the uninitiated the field line, carried on by the McGill men, might seem to be more in the line of giving them a variation from the close order drill on the campus and the sham exercises. But this is not the case, however. The tactics employed in the skirmishes on the mountain and around the neighbouring country, are the same as the troops at the front are now employing against the Kaiser's men. A careful study of the German losses only goes to show how effective this method of fighting is against the closed-in ranks of the Germans.

The meeting in the Engineering Building on Tuesday Captain Allan Magee told the men that only those who are willing to work are desired in the C.O.T.C. This spirit of willingness, and, in fact, eagerness to learn, is to be the keynote of the McGill C.O.T.C. If indications can be believed, everyone realizes that he is engaging himself for serious work and not merely for the pleasant pastime of "playing soldiers."

The instructors in the C.O.T.C. have all expressed themselves as being more than willing to do all in their power towards turning out men, in March, who will be proud to say that they took all their qualifying work at McGill.

Recruiting for the University Battalion in Toronto is still progressing. Fully 1,500 have now enrolled, and the instructors have as much as they can do to handle the men who turn out faithfully to drill every evening. A shower of rain drove a few early companies off the campus yesterday afternoon, but this did not stop them from drilling, for they continued their rifle exercise under the verandah at the rear.

The officials are well satisfied with the way in which the students are entering into the spirit of the movement, and while each faculty is well represented, the recruiting from the Applied Science section is amazingly large.

## THE GREATEST SWEATER SALE OF THE SEASON.

The greatest values ever offered in sweaters in this city are now offered by the Busy Bee Sweater Shop, 532 St. Catherine Street, West. All new stock fresh from the factories. Sweater Coats, \$2.49, regular price, \$3.75. Sweater Coats, \$7.50, regular price, \$12.00. We would ask the students to inspect our stock of sweaters before making their purchases. Remember the address, 532 St. Catherine Street West.

Prussian, of German militarism, the spirit which animates our entire people, from the Emperor down to the beggar, the spirit which stakes everything on national honor. Follow our example, if you can, O Englishmen, then we can resume our discussion."

Well, then, says the London Pall Mall Gazette, if the German people are one with German militarism, so much the worse for them!

"It is not a case of a refined and high-minded people overborne by a single brute. We are fighting with a nation whose moral level is intrinsically low, which has little trace of humane instinct, and still less comprehension of the meaning of honorable obligation. It is not only her rulers, but her people, who have to receive their lesson, and there is but one educational process to which the bully has ever been found susceptible."—Literary Digest.

## OUR INTEREST AND DUTY IN THE WAR

One of the results of the rapid organization of different societies through the Empire for aid in the present war has been the formation of a Central Committee for National Patriotic Organizations.

The primary aim of this association is to aid in stimulating and instructing public opinion in the causes and objects of the war.

The Honorary President of the Committee is the Prime Minister of Great Britain and the Executive is composed of a number of the leaders in English activities.

Under this Committee a great deal of overlapping will be eliminated. To effect this, representatives from all associations who enter into the scheme will be placed on the committee.

A special sub-committee will be formed to look after the literary campaign and it is proposed to distribute a large amount of literature on the war to neutral countries.

The following pamphlet has been issued by the committee and is well worth reading:

The British Empire is engaged in war with one of the most powerful military states that the world has ever known. The struggle is far more serious than any other in which we have been involved during the last hundred years. It is, therefore, our duty and our interest to consider carefully why we are at war, what we hope to gain from victory, and what we have to fear from defeat. If we understand this, we shall be in a position to make the most of our resources, and to meet the enemy on his own ground.

**NATIONAL HONOR.**  
First and foremost, we are fighting for our national honor. Some seventy-five years ago, when Belgium became a separate state, we solemnly guaranteed her independence and neutrality. About thirty years later, after a struggle which nearly involved France and Prussia in war, we likewise guaranteed the independence and neutrality of Luxembourg. Great Britain, and the other great powers which joined in these treaties, did so because they were just to themselves and to the other small states of Europe. In order to avoid a European war then and in the future, Prussia, which now guides and dominates Germany, was a partner with ourselves in the guarantee. False to her policy, she violated this guarantee, and she has thus gained a military advantage over France.

Now, if treaties are thus to be broken by the most powerful nation in the world, international agreements can be thrown aside at the moment they prove irksome to a great military power, what becomes of all international morality? Treaties are the means of ending wars, or of preventing wars. If they are broken, the world is plunged into a state of anarchy, and the most equally disastrous risk of war. The maintenance of treaties is essential to the peace of the world; and the state which wantonly breaks them is guilty of a crime against the whole of Europe. The Court of Arbitration at the Hague, and all similar contrivances for maintaining peace, vanish like dreams if international pledges are not to be observed. Nor does the effect of such conduct as that of Germany stop there. If international morality is regarded as of no account, a heavy blow is dealt at commercial and private morality as well. The reign of law, the greatest mark of civilization, is made a thing of the past. We should not tolerate, because we cannot afford to tolerate, such conduct between man and man. Why should we condone it between nation and nation?

Various efforts have been made to excuse the conduct of Germany with regard to Belgium. It is said that, if the German armies had been allowed to march through Belgium, they would have done her no harm. Germany offers the promise that, in the end, Belgium should receive back her territory and her independence at the end of the war, with compensation for temporary inconvenience and loss. But what security was there that such a restoration would take place? What trust could be placed in the promises of a nation which, in the very act of invading Belgium, flagrantly broke its word? The same plea of "necessity" which was held to justify that breach of faith, would have excused any subsequent repudiation of promises made.

Further, Germany excuses her action by declaring that she only violated Belgium's neutrality because France intended to do so, and had made arrangements for this purpose. Where is the proof of this? No proof whatever has been offered. The thing is, indeed, absurd. Why should Belgium have given France the advantages which she refused to Germany, thus exposing herself to the horrors of a German invasion, which in that case would have been justified? The real reason of Germany's action is that bluntly stated by the German Chancellor in Parliament, when he said that he was quite aware that it was wrong, but that necessity knew no law. There was no necessity for Germany to declare war, and, therefore, no necessity for her to break her word. If we had accepted in the same case the German's excuse, we should have become partners in the guilt, and could never have dared to raise our voice in defence of honor and justice again.

## SMALL STATES.

2. In the second place, we are fighting the cause of a small state, and of small states in general. The treaty guaranteeing the independence of Belgium binds us to defend a small, peaceable and industrious people, now attacked, without the smallest provocation, by a great power. What would be the speedy fate of the other small nations of Europe—Poland, Switzerland, Denmark, etc.—if Belgian independence were destroyed? The rest, so far as they could be brought within the German orbit, would inevitably be treated in the same way. Their independence would not be worth an hour's purchase. The Pan-Germans, an active and powerful party which clamors for the expansion of Germany by the absorption of all nations in any way akin to the Germans in race or language, would receive immense encouragement and impetus from a German victory in this war. This party has for years past demanded the annexation of Holland, Denmark, the Flemish provinces of Belgium, the German-speaking portions of Switzerland, the semi-German provinces of Russia, and the German parts of Austria. They look forward to the creation of a vast Germanic Empire, stretching from the North Sea to Poland and from the Baltic to the Adriatic; and if they succeed now, they will undoubtedly carry out their plan. All the gallant struggles of these

small states in the past, all the noble efforts for liberty and independence which have done them so much honor, and made them the flourishing communities which they are, would be rendered of no avail. They would be swallowed up as French are swallowed by a pike in a pond. And were we to stand by and see these things happen? It would have been rank cowardice on our part, as well as an indeleble stain on our national honor, had we, for the sake of our own peace and comfort, for purely selfish and material ends, stood aloof on this occasion, and permitted the German attack on Belgium to go unopposed.

And hence a word or two may well be said about Serbia. Many people seem to suppose that we went to war for her sake. Now it is true that the origin of this European war is to be traced to the quarrel between Austria and Serbia. The correspondence published in the Parliamentary White Paper shows how this came about. But, though the quarrel originated in the Austro-Serbian dispute, it is quite clear from the White Paper that the war was merely the pretext which Germany used in order to bring about the war which she desired. Into that question it is not necessary to enter further, but it should be observed that here also we have the case of a small state, Serbia, being attacked by a great power. Whatever we may think of the conduct of Serbia in the past, the Serbians showed their willingness to make all amendments possible, short of sacrificing their independence. They were supported and we can hardly doubt, secretly urged on by Germany, threatened not only to punish Serbia, but to destroy her independence, with a view to gain dominion over the other small states of the Balkan Peninsula. Consequently, although we are not directly fighting the cause of Serbia, and should never have thought of going to war because of the quarrel between Austria and Serbia, we are in fact fighting for the independence of a small state, Serbia, which is now being threatened with destruction by a powerful neighbor.

## POPULAR GOVERNMENT.

3. We are fighting the cause of constitutional liberty and popular government against that of autocracy and despotism. It will be said, in answer to this, that Russia, our ally, is despotically governed. But Russia has recently made great advances towards a free and constitutional government. Some fifty years ago the Emperor of Russia emancipated the vast masses of the rural population who, till then, had been serfs. He gave them the right to own land, and to be free men. He gave them the right to elect representatives to the Duma, a legislative body which has since been created. He has given the people a share in the Government. His murder put back the cause of liberty for nearly a generation, but Russia now possesses a national parliament—the Duma; and, although this body as yet enjoys but little power, the rapid advance of the commercial and industrial classes in Russia is bound eventually to lead to a constitutional government. As to France, our other great ally, she is a republic, and the chief representative on the Continent of democratic government. The constitutions of Belgium and Japan closely resemble our own. Germany, on the other hand, Germany, though she possesses the elements of popular government, has made no constitutional progress for the last forty years, and scarce any since the revolution of 1848. There is, it is true, a national German parliament, the Reichstag, elected by universal suffrage; but it has very little power, since ministerial responsibility is unknown in the Empire, while in Prussia, which dominates Germany, the franchise is so arranged that the monarch has no voting power in comparison with the Reichstag. The army, the navy, and the whole conduct of foreign affairs, there is no

check whatever on the absolute will of the Kaiser and the ministers whom he selects and dismisses at pleasure. The Kaiser is the War-Lord; the army and navy are his, and his alone. And, whatever the working classes may think or say, the classes who actually have power in Germany will go to the support of a practically despotic government with heart and soul, and have done so for the last fifty years. It is, therefore, no more than the truth to assert that England and her allies stand for popular government against despotism, and that, if Germany wins, her victory will go far to extinguish popular government throughout Europe.

## MILITARISM.

4. We are fighting for the cause of European peace, of arbitration against war, of the organization of the state on a pacific basis against militarism, and all that it implies. Militarism is engrained in the Prussian nature. It is the basis of the Prussian system of state; it is the means by which Prussia and Germany have grown to what they are, and which they are now trying to impose on the world by force of arms. The attack upon Belgium is a clear proof of the way in which militarism can demoralize a nation. But the conduct of Germany towards Belgium is only one of many instances which stain the history of Prussia. We need not go back more than fifty years. When Bismarck, the "man of blood and iron," came to power, his first care was to strengthen the army. The first great step towards the making of the German Empire was taken in 1864, when Schleswig and Holstein were torn away from Denmark by Prussia and Austria. This came the quarrel with Austria over the spoils of war, and the conflict of 1866, in which Austria was crushed, and Prussia became the acknowledged head of Germany. Finally, in 1870, Bismarck drove France into war, overthrowing her by force of arms, and annexed the provinces of Alsace and Lorraine, and created the new German Empire. All these triumphs were won by military force; and it was clear that German acquisitions could only be held by the sword, or by a policy which had the most powerful army in Europe to back it. Thus, militarism became more than ever the dominant influence in Germany; and German security seemed to depend entirely on military force. It is true that, after the French war, Germany remained at peace for more than forty years; but the military machine, tested in three triumphs, was now perfected in war. Towards the end of Bismarck's life, a policy of colonial expansion was adopted; German industry and commerce grew by leaps and bounds; and finally a great fleet was created.

The main object of this fleet was plain enough to everyone now. It was meant for the inevitable conflict with England—in-inevitable, because England stood in the way of German ambitions, which aimed at nothing less than the domination of the world; inevitable also, because Germany meant that conflict to come when France should be crushed and a good opportunity arose. The great historian and political writer, Treitschke, wrote years ago:—"We have settled with Austria; that last and hardest settlement, that with England, is yet to come." And it is now clear that for years past Germany has been preparing and working for this end. But the destruction of France, and afterwards that of England, could only be accomplished by overpowering military and naval force. And that is why Germany is primarily and fundamentally a military state.

To be continued.

## REGIMENT HAS GOOD DRILL ON THE MOUNTAIN

Hostile Wireless Party of Twenty on Mountain Attacked by Regiment

Last night, in spite of the unexpected snow, the Battalion had another very successful parade.

At 8 p.m. the men fell in at the High School and shortly afterwards set out on the evening's work. Five men were chosen from each company to form a party of hostile wireless operators, taking up a position on the top of Mount Royal. These men were instructed to try and make good their escape in parties of not less than two at any point between the "Southern Lookout" and the southern boundary of the Roman Catholic cemetery. After these men had taken up their position the battalion was lined along from Peel St. to the Roman Catholic Cemetery on the following streets:—Pine Ave., Cedar Ave., and the Cote des Neiges Road.

The wireless men were not very successful in making good their escape owing to the vigilance of the forces below and the fact that they showed up too plainly on the white background of snow. At 10.15 the four companies assembled at the park side and soon moved to headquarters. Marching on the streets was precarious to the equilibrium to the men as the hard packed snow resembled the shute of a toboggan slide. Although it was cold, the men were kept warm by the exertion of climbing the sides of the mountain.

The parade returned shortly after eleven o'clock to Sherbrooke street. Five hundred and twenty-five men were on parade, a very creditable showing.

## SOLDIERS OF PEACE

By Lester C. Gustin

Northward across the "Circle" Where the stalking snowstorms creep, Westward across the desert sweep, Southward amid the fivers, Where tropic leath-shafts light, The Soldiers of Peace are fighting Their never ending fight.

Not in the swirl of conflict, 'Mid crash of the smoking guns, On the crest of a wild charge surging Their toll-way pathway runs— But slowly with tape and transit, With shovel and pick and steel, Till the wondering jungles echo To the hum of the spinning wheel.

On the shores of the Northland oceans Where the stinging sleet claws grip, Their sea-walls mock the ice racks, Their larry battered ships, And the whining storm wind mutters As the sheeted bulk tears free, Safe to a man-built harbor, 'Wrest from an angry sea!

Through the burning land of dead things Where the demon sun God rules, Their coughing pack trains stagger Bringing supplies and tools To detachments of dauntless workers, Who laugh at the heat and thirst— Till the shimmering steel tracks conquer The land that God had cursed.

In the heart of the sunny Southland Where the sultry breezes sigh, The song of their panting dredges Flings echoes against the sky, And the lazy water gulls, As it chafes at its carthen chains,

## MILITARY LECTURES TO BE REPEATED

Lieut. Brunton Will Start Second Series of Lectures To-day

This evening at five o'clock in the large lecture theatre of the Chemistry and Mining Building, Lieutenant J. S. L. Brunton will give the first of his course of military lectures. Lieutenant Brunton has already given this course once this year and it is at the request of a number who were unable to attend the lectures the first time that the course is being repeated. The hour at which all the lectures are to be held has not been decided yet and will be arranged if possible to suit those who desire to take the course.

Lieutenant Brunton is well qualified to give these lectures, having graduated from Sandhurst as well as from McGill. Those who attended the first series were well repaid by the amount of information received, and any who have the time to attend the repetition of the course will find it well worth their while.

As the levee walls rise firmer, A guard for the sheltered plains.

Through the everlasting mountains Their pounding rock drills bite, And the yawning tunnels open, To the smash of their dynamite, Or a water pathway lengthens, Over the back of a great divide, Where their huge locks lift the fiers, Up the frowning mountains side!

When the flickering shadows lengthen, And the glowing embers pale, Their toil-scared veterans gather eleven o'clock to Sherbrooke street, Snatching a moment's freedom, Ere break of another dawn, With a thought of the deeds of to-morrow, A sigh for their comrades gone.

On the stretches of far Alaska, On isles of the restless deep, On the prairies of Central China, Their unknown heres seek, Where the Congo seeks the ocean, By the Orinoco's head, Slumber their nameless dead.

By a boiler's wild explosion, By the redskin's feathered dart, 'Mid the chaos of twisted girders, When the great bridge trusses part, By the burn of the wasting fever, With a smile as the pale lips blue, A curse that their work is finished, A prayer that the job goes through!

By the creak of their straining derricks, By the drum of their hammered steel, By their walls on the storm-lashed ocean, Working their rock-ribbed watch dogs dead, By the stretch of their water ditches, By their rails through the trackless wood, Ye shall know their work when ye see it, And know that their work is good!

Eastward across the surges Where the Old-World nations lie, Westward across the mountains That shoulder aside the sky, Hereward among the cities, In the sickly are-glow light, The Soldiers of Peace are fighting Their never ending fight.

Their's not the victor's aurel When a hard fought field is won, No cheers of a grateful people, But pride in a task well done; No bane of the conqueror's trumpet, No garlands of flowers cast, But the sight of a work well builded, And a faith that that work will last!

Civil Engineer, 23 Dartmouth Street, Somerville, Mass.

## Sweaters, Sports Coats, Mackinaws, Overcoats, Cardigan Jackets and Vests for Ladies and Gentlemen

MADE IN CANADA

From the Purest Wool

Owing to enormous contracts having been placed by the Government for the Army, we have secured the whole of the stock on hand of one of the largest mills in Canada, and are selling these goods at and below the factory cost.

This is no fake Bankrupt Sale, neither are the goods soiled or damaged; but every article is guaranteed all pure wool, perfect in fit and finish, and

## Made in Canada

We have Sweater Coats from \$2.49 to \$7.50. Regular price \$3.75 to \$12.00.  
Ladies' and Gentlemen's high grade hand-tailored Overcoats, made of a knitted cloth, which is very warm, and very light in weight. Prices from \$15.00 to \$25.00. Regular \$25.00 to \$60.00.  
Men's Fancy Woollen Vests, \$2.25. Regular \$7.50.  
Ladies' Fancy Woollen Vests, \$1.50. Regular \$6.50.

It will pay you to get acquainted with the store; you can save money; call in and inspect the goods. No obligation to buy.

REMEMBER THE ADDRESS:

"BUSY BEE" SWEATER SHOP  
532 St. Catherine Street West  
In the C. C. Cottrell Building
